

LPB1 Aluminium Traditional Lamp Assembly

LPB1 Aluminium Traditional Lamp Assembly

Town and Park's *Traditional* lighting systems provide architectural solutions for any scale urban or landscape project. *Vandal resistant* assemblies manufactured from *corrosion resistant aluminium* provide an extensive range of lighting for pedestrian walkways, malls, shopping centres, plazas, streets and parks. The system offers an optional street level *access hatch* allowing the isolation of individual units for servicing requirements.

In conjunction with one of the world's leading lighting manufacturers we offer an extensive range of luminaire styles to suit our lamp assembly systems. A wide choice of lamp sources are also available.
